

TREMOL® G03 TIMS TYPE B/C CONTROL UNIT

Integrated for QuickBooks Desktop

The Tremol G03 Control Unit is an invoice validation device that will ensure your financial documents meet the new KRA TIMS electronic invoice regulations. The G03 comes in 2 types: Type B for retail POS application users, and Type C for Accounting applications such as QuickBooks.

This unique solution comes in a small footprint to ensure it optimizes on retail working space at an economical price point. It's advanced API tools cater for a wide range of operating platforms and programming languages for easy integration to your systems.

Fully integrated with QuickBooks – for all users of QuickBooks 2010 onwards.

The Smart QB Integration takes care of the data transfer between QB – TIMS servers and back into QB on a real-time basis.

Smart QB Integration with Tremol G03 Control Unit
