

DTR TMU FB33C

TIMS TYPE C

CONTROL UNIT

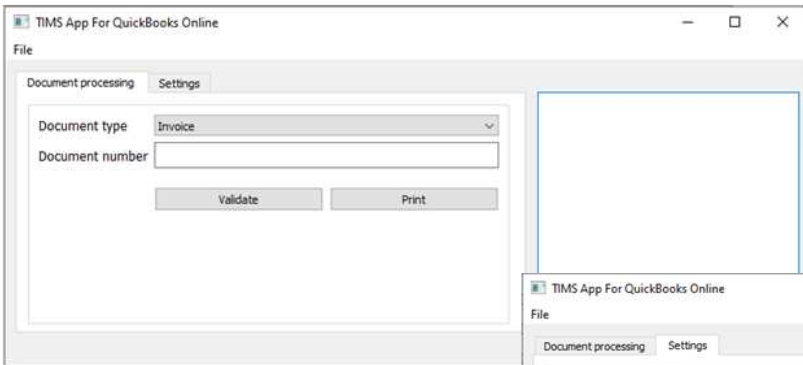

Integrated for QuickBooks Online

The DTR TMU FB33C Control Unit is an invoice validation device that will ensure your financial documents meet the new KRA TIMS electronic invoice regulations.

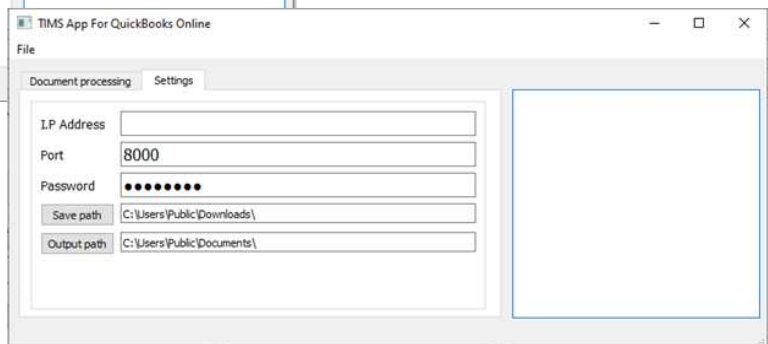

Fiscal Middleware architecture is built on current and emerging technologies such as wired and wireless networks, Big Data, Analytics and visualization tools. The Fiscal Middleware emphasizes remote access to reduce downtime through remote diagnostics, trouble shooting and condition monitoring capabilities. All these approaches are aimed at improving unplanned downtimes, improve regulatory compliance and enable all connected assets to function in a more effective and efficient manner. The DTR TMU FB33C is a Type C for Accounting applications such as QuickBooks.

Fully integrated with QuickBooks Online via our TIMS App for QuickBooks Integrated Solution.

Create your source document in QuickBooks Online and save it. On the TIMS app for QuickBooks Online validate the document on the document processing section.

(This sends the data from QBO to KRA TIMS Servers for verification and response is received and saved back into QBO)

Go back to QuickBooks Online open the invoice and print the invoice and present to your customer.

For any reprints – simply print to pdf again from QuickBooks Online (Anytime you need)

The Process: Install.... Configure.... Setup....Test....Validate....

Easy to use, with all data integrated back into QuickBooks Online.
